Colorado PI Acquisition: Traffic & Lead Strategy

Owned-asset growth engineered around Colorado's 2025–26 legal shifts

Two Colorado laws just redrew the market

Damage caps raised — HB24-1472 (2025)

Non-economic damages cap rose to \$1.5M for most tort actions filed on/after Jan 1, 2025 (\$2.125M wrongful death; biennial inflation adjustments from 2028).

Serious cases are being valued under new math — education converts.

Lead-buying banned — SB26-174 (Aug 2026)

Third-party legal lead generation becomes a deceptive trade practice in Colorado. Competitors renting pipeline from lead brokers lose their supply.

Owned organic + first-party capture is the compliant moat.

Strategic conclusion: every dollar goes into assets we own — rankings, list, brand — not rented leads.

Sources: leg.colorado.gov/bills/hb24-1472 · leg.colorado.gov/bills/SB26-174

The asset stack is already built — live in staging

100

SEO landing pages
6 intent clusters, QA-passed

24/7

AI phone intake ('Sky')
books consults live

2 min

case-value estimator
→ tagged GHL lead

100%

source attribution
UTM → GHL on every lead

Capture, wired end-to-end

Estimator + Sky both create GHL contacts tagged "Colorado Personal Injury Lead" with intake summaries, recordings, and source fields. Failed pushes dead-letter to logs — no lead silently lost.

Speed-to-lead, automated

New estimator leads with a phone number get an outbound follow-up call from Sky within minutes (business hours MT), offering to book the consultation while interest is hot.

Staging link

whiteford-mountain-west-injury.vercel.app

Remaining: GSC submission, brand-domain decision, GHL email sequences (this deck's ask).

One funnel, two front doors, everything owned

The list is the asset

- Warm searchers land on the page that matches their exact intent — never a generic homepage
- Most conversions happen at contact five-plus — the follow-up layer does the compounding
- Every path converts toward traffic we OWN: the tagged, attributed GHL list

The math that governs every channel

\$12k

planning fee per signed case
(conservative blend)

3 : 1

minimum return on
acquisition cost (Hormozi)

\$4,000

ceiling per signed case

≤ \$500

target cost per qualified lead
(6-8 leads per signed case)

Paid budget arc — gated, patient capital

Why the gate matters

Contingency fees lag spend by 12-18 months — paid budget is patient capital, not cash-recycling.

Scale gates: blended paid CPL ≤ \$500 and ≥1 attributed signed case in 90 days. Kill any ad at 2× target CPL with zero qualified leads; multiply winners.

Every channel is judged on cost per signed case — attribution is already live.

Sharpen the offer before buying traffic

Lead magnet — "Colorado Case Value Snapshot"

Free 2-minute educational read on what drives cases like yours under the 2025 damages law. Reason-why naming, zero friction. Already built — this is the sharper wrapper.

Consultation — "Claim Game Plan Session"

Named and concrete, not another "free consultation": deadline check · evidence-preservation checklist · straight answer on whether counsel is warranted · insurer-conversation briefing.

The guarantee (law-native)

"You pay no fee unless we recover for you." The contingency structure is the strongest trust lever in legal marketing — lead with it everywhere. (Attorney review: costs-vs-fees disclosure.)

One core belief, repeated everywhere

"Insurers pay full value only to claimants prepared to go to trial — and that preparation is what a national trial platform provides from day one." Masten's insurer-defense past is the proof story.

Organic engines — months 1-2, \$0 media

Own search

Finish the last mile:

- GSC submission + sitemap
- Brand domain + GBP + review engine
- Legal/local directory profiles (profiles only — no lead-gen products)
- Monthly content additions where rankings emerge

Publish weekly

One 10–15 min "master show" video weekly — myth-busting Colorado injury topics, hook → story → offer.

Each becomes: Shorts, landing-page embeds, the weekly email, GBP posts.

Over-give, ask rarely (≥3.5:1).

Earn the audience

Colorado Target-100: safety-beat reporters, podcasts, ski/cycling communities, adjacent professionals.

Relationship + education only — never paid referrals (RPC 7.2).

Newsjack asset: the 2025 caps change is genuinely newsworthy.

Paid engines — gated, profitable, compliant

Channel	Role	Gate
Google Search PPC	First paid dollar. Long-tail "case worth" terms → Snapshot (cheap) · high-intent lawyer terms → call (Sky answers 24/7) · branded defense.	CPL ≤ \$500 · signed case in 90 days
Meta retargeting	Site visitors, estimator abandoners, video viewers — educational tone, film creative (dramatization labeled).	Launches with PPC · \$0.5–1k/mo
Meta cold · YouTube pre-roll	Only after organic proves the hooks. CO-geo, Snapshot goal, feeds retargeting pools.	CPL ≤ 2× Google's
Google LSA	Economically excellent — but pay-per-lead format needs an SB26-174 legal read first.	BLOCKED pending attorney review
Excluded permanently	Lead marketplaces · per-lead brokers · paid referrals · review buying.	SB26-174 / RPC 7.2

Kill at 2× target CPL with zero qualified leads. Multiply winners. Fix the worst funnel step before adding any new channel.

90-day rollout

Weeks 1-2

GSC submission · GBP + reviews
Warm-outreach announcement
GHL sequences live (your build)
Sky outbound: LIVE ✓
Brand-domain decision

Weeks 3-6

Weekly master show launches
Directory / profile layer
Target-100 engagement begins
3 cold bridge pages
Weekly email cadence

Weeks 7-10

PPC value terms + branded
Retargeting live
First earned-media pitches
LSA legal decision

Weeks 11-13

PPC high-intent terms (if gate passed)
First kill/scale review
Quarterly report vs. unit economics

The GHL build — what we need from you

1 · Intake nurture workflow

Trigger: Contact Tag Added = "Colorado Personal Injury Lead" → 5-email sequence (copy supplied, paste-ready) with waits 15 min / 1d / 1d / 1d / 2d.
Exit on reply, booking, or "do-not-sequence." Skip anyone tagged "client."

2 · Weekly cadence

Story-first weekly broadcast to the same tag (starter topics supplied), suppressing anyone still inside the intro sequence.

3 · Hygiene + alerts

Verified sending domain, monitored reply-to, tracking on. Advertising footer + unsubscribe stay exactly as written (compliance). "Urgent Review" tag → instant SMS/email to intake.

4 · Weekly dashboard

Source/UTM fields already populate on every contact. Build: leads by source · sequence engagement · booked sessions · signed cases by source.

Guardrails, open items & timing

Attorney-review gate (before first paid dollar)

Contingency phrasing + costs disclosure · LSA vs. SB26-174 · dramatization labels in ads · email/SMS footers + consent · AI outbound script · review-request flow · offer names.

Permanent exclusions

No outcome promises · no manufactured scarcity · no purchased leads · no paid referrals · no "best lawyer" claims.

Decisions needed: brand domain · LSA position · call-tracking vendor.

Timing: Masten Childers and Paul Nussbaum are in Colorado in a few weeks for a practice implementation session — target: email sequences live and first dashboard numbers in hand before they arrive.
